Subject: Massive Intermodel Facility Must Have Full EIS

Regarding the proposed "Intermodel" facility in Johnson County - there are serious flaws in the data and methods used to create the models submitted to the Corps. - the impact on air, water, traffic and roads has been significantly underestimated and needs a thorough environmental impact statement to assess the full effects on the people and resources of this region. NAFTA is a travesty that has already cost 1000's of US jobs.
